

Everybody uses a website on a daily basis, but do you know how to test a website?

Web Testing

We all have to do with websites every day, but do you know how to test a website? You cannot afford to focus primarily on the functionality of a website. Non-functional testing like usability, compatibility, performance, security, etc deserves equal attention from your testing team.

Course Objectives

This course provides professionals involved in testing with the basic information, tools and a lot of tips and tricks about web testing. After the course you will be able to:

- Increase the quality of your web application
- Use a dedicated test approach for web applications
- Save costs through increased efficiency and faster time to market

Typical Audience

This course is intended for anyone involved in testing and quality matters, including Test engineers, Test managers, Test consultants, Project managers and Quality managers. Anyone who is not directly involved in testing and quality, but who has a strong interest in quality control of websites is also welcome.

Prerequisites

Basic understanding of structured testing process is a must.

Course Outline

This course is spread over two days. The focus of day one is on the basis of websites and the functional part of testing websites. On the second day the focus is on the non-functional testing of a website.

DAY 1

- **Introduction**
 - Introduction course
 - Introduction internet and web
 - Architecture of the internet and web
 - Evolution of the internet and impact of the internet
 - Why web testing?
 - Structured Testing (if needed)
- **Module 1 – Functional Testing**
 - Unit testing
 - Client/Server functionality
 - Sessions

DAY 2

- **Module 2 – Non-Functional Testing**
 - Compatibility
 - Performance
 - Security
 - Usability

CTG ensures the consistent delivery of the highest-quality services through proprietary best practices formally defined in our global quality system. CTG is among the first in our field to have designed and implemented a comprehensive Total Quality Management program. This program guides our employees worldwide in qualifying opportunities, delivering projects on time, hiring the right professionals, and ensuring that client requirements are fully

Course Delivery

Approximately 50% of the class is devoted to lab exercises and workshops.

Throughout the course, an experienced trainer and software testing expert provides lectures and gives exercises based on real world projects. Courses can be given in English or Dutch. Course material is in English.

Course Duration & Venue

The course duration is 2 days.

The course can be given at the client's site or at CTG.

Administration & Pricing

▪ Pricing

VAT excluded, course material, lunch and beverages included.
€ 500 per person per day (15% discount from the 5th subscriber).
€ 3000 for a group of 7 to 10 persons per day.

▪ Cancellation

By Participant – If a subscribed course participant is replaced by another participant or if the public course is postponed to a later date no cancellation costs apply. A participant or a group that fails to attend, or that cancels a course without at least 15 working days written notice prior to the course start, is liable for the full subscription cost.

By CTG – CTG reserves the right to cancel a course at any time.

▪ Course Logistics

All classroom courses begin promptly at 9 am and are scheduled until 5 pm. When a course takes place at the client's site, the client is responsible for the set-up of the classroom, including installation of the necessary software. A calendar with course dates is available on our website.
