Evolve Beyond Traditional Acquisitions with Epic Community Connect

In today's evolving landscape, the most successful health systems are discovering that meaningful impact comes from creating connected communities of care that preserve provider independence while sharing clinical excellence. Through Epic's Community Connect program, your organization can extend its Epic EHR capabilities to community providers, uniting your network under the powerful vision of one patient, one record, and one community of care.

Why Choose Community Connect:

Strategic Growth
Transform your market presence by building lasting partnerships that expand your network's reach.

Enhanced Clinical Collaboration
Unite your care community through seamless clinical data sharing and workflows, enabling better clinical decisions and improved patient outcomes.

Preserved Independence
Offer providers the benefits of enterprise-grade technology while allowing them to maintain their unique identity.

Accelerated Digital Transformation
Leverage your existing Epic investment to create a modern, integrated care delivery network that positions your organization for success.

Primary Connect Program Phases:

Phase 1   **Standing up** a Connect Program

Phase 2   **Rolling out** Connect

Phase 3   **Maturing** Your Connect Program

Technology Meets Mission:

Technology reconnects caregivers with their true calling: practicing hands-on medicine and making meaningful differences in patients' lives. Community Connect helps by bringing the power of a robust Epic EHR system to the community network.

CTG understands how extending your Epic EHR to strategic partners in the community expands the health network without some of the risks involved in acquiring physician or hospital organizations. Our tools and methodologies span the program life cycle and support your investment in rolling out Community Connect.
